

Abdullatif Almutairi

App Developer

Riyadh, Saudi Arabia +966 50 006 6172 abdullatif.almutairi@outlook.com github.com/abdullatifalmutairi

Applied College graduate with a Diploma in Smart Device Application Development. I combine mobile product thinking, UX foundations, and careful execution. Looking for a junior app developer or digital product role in Riyadh where I can ship useful interfaces, learn fast, and deliver clean, reliable work.

EXPERIENCE

Enterprise Resource Management System Specialist Sep 2024 – Nov 2024

Saudi Research & Media Group (SRMG)

Riyadh · On-site · Past role

- Supported day-to-day ERM system operations in a large media enterprise.
- Worked inside structured workflows with focus on data accuracy and follow-through.
- Coordinated with internal teams to keep processes clear and reliable.
- Practiced professional documentation, communication, and attention to detail under real workplace pressure.

FEATURED PROJECT

Harfah App Mobile concept

Traditional craftsmanship marketplace

Product concept · user journeys · UX direction

- Designed a mobile marketplace concept for artisans to showcase, market, and sell handmade products.
- Mapped buyer and seller flows around discovery, storefront simplicity, and trust.
- Framed the product around wider market access while preserving cultural craft heritage.
- Emphasized clean UX, practical storefront structure, and sustainable digital commerce for local makers.

EDUCATION

Diploma, Smart Device Application Development Aug 2022 – June 2024

Majmaah University · Applied College

Full-time program focused on mobile application design and smart device software foundations.

- Built foundations in mobile app design, user-centered thinking, and development tooling.
- Practiced turning product ideas into clear screens, flows, and practical solutions.
- Strengthened problem-solving, analytical work, and teamwork through applied coursework.

TRAINING

User Experience Design Foundations Google

UX fundamentals, usability principles, and design process basics.

- Covered user research basics, wireframing thinking, and simple usability evaluation habits.
- Applied UX principles to keep product decisions clear for both users and makers.

HOW I WORK

- Break problems into clear steps, communicate early, and keep interfaces simple.
- Stay organized under pressure and learn new tools quickly when the work needs it.
- Care about details, documentation, and delivering work others can trust.
